

PUROO KULSHRESTHA

Generative AI Developer – Software Engineer

kulshresthapuroo123@gmail.com | [Linkdin: Puroo](#) | +91-7738878793 | Navi Mumbai, Maharashtra

Summary

Generative AI Engineer with ~2 years of experience building production-ready AI solutions, including RAG pipelines, multi-agent systems, and LLM integrations using LangChain, LangGraph, and MCP. Skilled in Python, FastAPI, PGVector, and Azure AI Search, with good full-stack experience in Angular and Node.js. Focused on delivering scalable, high-performance GenAI applications that enhance automation and enterprise productivity.

Skills

Programming Languages: Python, Java, SQL

Generative AI: LangChain, LangGraph, CrewAI, Agentic AI, MCP, RAG, Prompt Engineering, Instruction Tuning, LLMs, Hugging Face, Vector Databases & Search: PGVector

Backend & APIs: FastAPI, REST APIs, API Integration, Microservices

Databases: PostgreSQL, Redis, SQL

Frontend: Angular, HTML, CSS

Tools & DevOps: Git, GitHub, Docker, CI/CD, Azure Dashboard

Experience

Senior Software Engineer, Capgemini –

Aug 2024 – Present

- Built agentic GenAI solutions and RAG pipelines using Azure AI Foundry, Azure AI Search, and Hugging Face LLMs for autonomous reasoning and contextual retrieval.
- Created multi-agent workflows using CrewAI, LangGraph, and MCP for adaptive decision-making and secure tool orchestration.
- Implemented persistent memory with Redis, and PGVector for context-aware, personalized AI interactions.
- Added HITL(Human-in-the-loop) validation loops for accuracy, reliability, and iterative model improvement.
- Enforced LLM guardrails including prompt-injection prevention, schema-validated I/O, PII redaction/masking using Azure Text Analytics Client(Language Service) and policy-based tool control.
- Delivered enterprise-grade UIs in Angular integrated with GenAI backends (Python, FastAPI, Node.js).

Projects

- **GenAI Analytics Chatbot | Capgemini:** Built LLM-powered analytics chatbot using Azure OpenAI for natural language querying of enterprise datasets; contributed to LLM evaluation frameworks and response optimization.
- **Agentic AI Initiative | Capgemini:** Working with multi-agent workflows using LangGraph and CrewAI for tool orchestration; resolved Sonar issues and contributed to architecture design.
- **AI Chatbot (RAG-Based):** Built secure RAG chatbot using Azure Cognitive Search with isolated workspaces, context-aware LLM reasoning, and document-grounded responses.

Education

GLA University Mathura - B.Tech in Computer Science & Applications

Aug 2020 – May 2024

Certifications

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified : Azure AI Apps and Agents Developer
- Claude Certified Associate – Foundations
